FS-QXQ

The FS–QXQ series suits insulating glass production stations such as vertical glass sealing machines, vertical edge grinders, vertical glass drilling machines and vertical film coating machines, where glass must be turned up or down. Pneumatic cylinder lifting and 0~90° vertical pneumatic rotation; the unit is compact and easy to operate. At fixed stations it can be installed on a pillar, a wall bracket or a bridge-type rail.

Specifications

Model	Safe working load	Dimensions (mm)	Pad diameter (mm)	Number of pads	Power source	Control	Function
FS–QXQ250–4S	250kg	850×570 Extended: 1800×570	Φ250	4 pads	Compressed air (0.6~0.8Mpa)	Manual	0~90° pneumatic rotation
