MaxiCrane Mini: 100 kg, 3 m

Articulating jib crane – MaxiCrane Mini

MaxiCrane Mini offers the same lifting capability as the standard MaxiCrane, with capacity up to 100 kg, but with a shorter arm (3 meters). It is ideal for work areas with low ceilings or without room for a standard crane.

Quiet, smooth-running arm

Thanks to its low weight and low-friction ball bearings in the pivot joints, MaxiCrane Mini runs extremely smoothly. Like other **Lifts All** equipment, this mini crane can be:

- Installed quickly at any height
- Securely mounted on a steel column
- A time and cost saver

Low-profile articulating jib crane – easy to pair with grippers

The outer arm integrates the **Bal-Trol**, creating a low-profile crane structure suited to the tightest workspaces while still **providing maximum lifting height** for the operator.

You can choose to:

- Fit a hook for lifting boxes or rolls
- Fit a vacuum gripper for carton boxes
- Fit a mechanical gripper for rotating material rolls

Grippers are custom-designed to optimize material handling and usually share the same coupling, so they can be **changed quickly by a single operator**.

MaxiCrane Mini – a compact, efficient and easy-to-use lifting solution for any workspace.
