RAIL SLEWING JIB CRANE

- Max. load **500kg**, reach up to **4 m**
- **360°** rotation with optional travel stops; moves easily by hand. In most cases it can be bolted directly to the floor without a special foundation. The slewing axis uses tapered roller bearings to keep the boom concentric with the pivot and prevent unnecessary sway.
- Enclosed guide rail protects internal components
  Effectively keeps dust, debris and liquids out of the rail, ensuring long-term stability in demanding work environments.
- Cost-effective
  Suits a wide range of applications, with low power, low energy consumption and long service life.
