Traverse Systems

Overhead rail system (Traverse system) – Max load 600 kg

Lifts All overhead rail system

Minimal floor-mounted crane, space saving

Aluminum overhead rail system for loads up to 600 kg (1,400 lbs)

The Lifts All overhead rail system is built from **extruded aluminum profiles** – strong yet flexible, with **smooth, quiet operation**, ideal for a good working environment. Compared with other light crane systems on the market, the Lifts All system needs only **1/3 of the force** to move a load.

The system can be installed in several ways: **ceiling mounted, wall mounted or on existing columns** – depending on the space and environment of the facility. We also offer custom solutions to suit each workstation and each customer's specific lifting needs.

- **Max load** 600 kg
- **Travel force** 1/3 force
- **Material** Extruded aluminum
- **Experience** 20+ years

Why choose Lifts All aluminum rails

Smooth & effortless

- Built from extruded aluminum – a strong yet light and flexible structure.
- Smooth, low-noise operation – a better working environment.
- Needs only **1/3 of the force** to move a load compared with conventional light crane systems.
- Less operator fatigue and steady productivity throughout the shift.

Flexible & customizable

- Versatile installation: ceiling mounted, wall mounted or on existing columns.
- Customized to the space, environment and lifting requirements.
- More than **20 years of experience** handling difficult installation conditions.
- Combines with the Bal-Trol hoist and grippers to form a complete system.

Typical installation types

Solutions for every facility condition

If the ceiling is too high or too low, or other factors make installing a lifting system difficult, Lifts All will find a suitable solution for you. With more than 20 years of experience customizing lifting systems, we always find an option that matches your needs and your workstation.

The overhead rail system can also be customized: a **low-build** version to save headroom, or an **extendable** version. For example, if you need to reach an area outside the rail system frame, we can add a **telescopic rail** for this purpose.

Clean room systems

In its basic form, the rail in the Lifts All overhead rail system is already **suitable for clean room environments**. With a few simple accessories, we can seal the slots in the rail to prevent fine dust from collecting inside – meeting the strict hygiene requirements of the pharmaceutical, electronics and food industries.

Floor-mounted overhead rail system with 2 support columns (gallows)

FULL-SHARP AUTOMATIZED VN (FULLSHARP)
Authorized distributor of Lifts All AB (Sweden) lifting equipment in Vietnam
